Work History

Career Break / Gap Year

Sep 2023 – Present

- Took intentional time out for travel, personal development, and self-reflection
- Used the period to recharge and refocus
- Now motivated and ready to re-enter the workforce

Coates Group / Front-End Developer

Jan 2018 – Aug 2023

- Architected and maintained enterprise-level applications using React, TypeScript, and Nx monorepo.
- Engineered reusable content templates for major national and international clients.
- Mentored new developers and led peer code reviews to ensure codebase integrity and performance.
- Developed and documented modular UI components using Storybook for consistent design implementation across projects.
- Partnered with stakeholders in an Agile environment to design, troubleshoot, and deploy features on proprietary hardware.
- Took ownership in multiple projects and successfully navigated feature builds to be delegated within the team.
- Participated and contributed in task breakdowns and time estimation during sprint planning to ensure resources are used effectively and accurately.
- Worked in multiple teams to assist in streamlining connecting features across projects.
- Responsible for ticket creation to include all necessary details and reference information to facilitate completion.
- Analyzed and implemented binary search algorithm for better performance and optimization.
- Debugged existing sync issue and implemented a solution from understanding of event loop process.

MullenLowe Profero / Junior Front-End Developer (Contractor)

Jul 2017 – Nov 2017

- Localised web content and implemented responsive designs using an in-house CSS framework.
- Managed code updates and participated in collaborative reviews using SVN.
- Ensuring UI is pixel perfect across multiple viewpoints and devices to align with companies strict guidelines.
- Collaborate with interactive producers to align on user experience and content quality requirements.

Retriever Communications / Graduate Front-End Developer

Sep 2016 – Apr 2017

- Designed and developed reusable UI elements using the Polymer library.
- Aligned with the backend team to ensure API compatibility and functionality with the frontend.
- Conducted benchmark testing and research to improve site speed and cross-browser compatibility.
- Worked alongside Project Manager and Business Analyst to understand and gather requirements to design ui elements.

Education

Western Sydney University / Bachelor of Information and Communications Technology

2012 – 2014
